

Did you know that the Norwegian coastline is the world's second-longest?

Dotted along the 57,000 km-long coastline are 1,700 named fjords and 200 ports. From Kristiansand in the south to Kirkenes, 400 km north of the Arctic Circle, we handle containers and breakbulk to and from each port. No matter your place of delivery or dispatch via Air, Ocean, Rail, and Road, we know how to move your cargo in and out of Norway.

Getting your cargo safely from A to B in Norway requires local knowledge of how to best navigate the steep and winding roads that criss-cross the rocky landscape clad in winter colors half of the year. Our team of experts knows the optimal transport mode for the season, the best routes, and how to negotiate the best price and find the right specialized solution for you. If you want safe in and outbound logistics, we know our way around in Norway.

Handpicked and with a long collective experience, our team offers you complex supply chain management to uncomplicate your world. No matter your type of specialization, our business is to secure your shipments' integrity and the safe, timely pickup and delivery of your goods wherever whenever.

No matter how far we have to go, we'll handle your cargo from door to door.
