

ENVIRONMENTAL POLICY

»» SCAN GLOBAL LOGISTICS – ENVIRONMENTAL POLICY

Scan Global Logistics A/S and all subsidiaries worldwide comply with this overall Environmental Policy.

We have determined a very ambitious long-term target and we will reduce our environmental footprint of greenhouse gasses (GHG) in close cooperation with customers and suppliers.

We will continue to take initiatives to reduce the CO₂e emissions from our operation as a part of our commitment to the most ambitious Science Based Target of limiting global temperature rise to 1.5°C degrees.

Our target is supported by our focus on the two UN Sustainable Development Goals:

13: Key ambition to reduce our CO₂e emissions and especially help our customers with their Scope 3.

17: Drive the zero carbon journey together with like-minded companies.

Considering environmental conditions is an integrated part of our management system and our overall work ethics.

We are committed to:

- Complying with applicable environmental laws, regulations and legislation.
- Supporting our Customers and Vendors in reducing their GHG footprint.
- Securing a high utilization of the capacity in all transport modes.
- Establishing partnership with all stakeholders along the supply chain to enable CO₂e reduced transportation solutions.
- Having an open dialogue with authorities, customers, suppliers and other stakeholders, and providing information regarding our environmental performance.
- Influencing customers and suppliers to choose solutions with low CO₂e emissions whenever possible.

- Informing our customers on environmental challenges and providing them with a full CO₂ overview regarding the emissions attached to their shipments.
- Take a precautionary approach to challenges on the environment.

We will achieve the following environmental targets:

- Reduce the electricity consumption in our premises.
- Reduce our CO₂ footprint in our premises.
- Improve sorting and recycling of all waste in our warehouses.

Once a year our targets are evaluated and belonging action plans conducted.

We will comply with:

- ISO 14001

The majority of our organization is covered by our ISO 14001 Multiple site certification - and the rest of the world will shortly follow.

*Taking sustainable **actions now**,
for the **generations to come**.*
