Scan Global Logistics expands in Germany

14 Sep, 2018 | Share

Effective August 1, 2018, Scan Global Logistics opens an office in Hamburg, Germany. In 2017, the company acquired Crosseurope AB, which included a smaller hub in Straslund. The opening in Hamburg is therefore initiated in order to secure a continued growth in the German market.

Scan Global Logistics have a very strong road network in the Nordic countries and are especially successful in the Swedish market. For this reason, the company is now ready to develop its road services further in the European market and looking towards the southern neighbours in Germany is seen as a natural extension to the current network.

Mr. Hans Henrik Beuschel is appointed to fill out the position as Managing Director and will have a strong focus on developing the partner and distribution network in Germany. He has a vast experience within the German road segment and through more than 13 years he has been a part of developing the road segment of E3 Spedition in Germany.

“We are convinced that Hans Henrik with his broad experience and extensive industry knowledge is the right person to lead the development of our presence in Germany”, says Thomas Nørgaard, CEO Road & Solution at Scan Global Logistics.

“I am proud and happy to have been given the opportunity at SGL Road to take part in the development and strengthening of our road activities in the European market and especially in Germany. I look forward to bring SGL Road closer to a pole position in the German market and I am excited about the great work ahead of us. The organization is well-structured with extensive expertise at all levels and has a very positive and employee-friendly attitude. For this reason I am confident that SGL Road is well-dressed for realizing our short and long-term objectives”, says Hans Henrik Beuschel, Managing Director, SGL Germany.
