

**Did you know  
that France holds  
the world record  
in days on strike?**

**In 2018, the French temperament sent the country on strike for 114 days (per 1000 employees). Still, the country remained one of the top-most productive in Europe. However much we like a coffee break in a café, efficiency, reactivity, and flexibility guide our actions, so be confident that your goods arrive on time no matter the obstacles on the way.**

Centrally located in Europe, France offers an extensive B2C and B2B distribution network to the main European markets such as the UK, Germany, Belgium, and Holland. Whether by rail or road, we operate on the second-largest railway and the largest highway network in Europe.

Do you prefer ocean freight? 3 major ports and 4 sub ports cover the long coastline of France. Our expert team knows the best routes, negotiates the best prices, and specialise in finding the right solutions.

Our team is handpicked with 125 years of collective experience to offer you complex supply chain management to uncomplicate your world. No matter your business, our business is the integrity, handling, and safe and timely delivery of your goods, from wherever to wherever.

We are happy to help “de-complicuer” the French world of logistics.
